Cloud Computing		
Introduction to Cloud		04th October (07:10-08:10)
Cloud Fundamentals	What is Benefits of Cloud	06th October (07:10-08:10) 07th October (07:10-08:10)
Cloud Fundamentals	Types/Models of Cloud	08th October (07:10-08:10) 09th October (07:10-08:10)
Fundamentals	Introduction to " Service Tour Subscription"	11th October (07:10-08:10) 12th October (07:10-08:10)
Networking	Understanding How Why VPN (Hands-On) What is Region What is a Vnet	14th October (07:10-08:10) 15th October (07:10-08:10)
Networking	Using N-Tier Architecture Network Security Groups Load balancer Availability and High Availability Application Gateway DNS Traffic Manager	19th October (07:10-08:10) 22th October (07:10-08:10)
Compute	Virtual machines - Containers App Service Serverless computing Scaling VMs in Scaling Availability Sets VM Types and Sizes Containers Kubernetes Services App Services	24th October (07:10-08:10) 27th October (07:10-08:10)

Storage Types of Data	Overview of Storage Types of Storage SQL DB Cosmos DB Blob Storage Data lake Storage Files Queue Disk storage & Storage Tiers Encryption and Replication Storage Explorer Comparison between Data & Storage and On-prem Storage Hands-on Blobs/Files Storage	30th October (07:10-08:10) 01st November (07:10-08:10) 02nd November (07:10-08:10)
Security A layered approach to security	Usage Scenarios Identity and ACloudess Management, Encryption Certificates Protect Network Protect Shared Documents Advanced Threat Protection	05th November (07:10-08:10)
Machine Learning	Setting up Monitoring Service Health Policy Define IT compliance with Policy Organize policy with initiatives Enterprise governance management Define standard resources with Blueprints Explore your service compliance with Compliance Manager	07th November (07:10-08:10)
Backup/Recovery ARM Cost Optimization Overview of Backup	Vaults Scheduling Backups for VM's Configure DR, Cost Optimization and Spending	10th November (07:10-08:10)
